Data Profiles-Rhode Island-Cranston

Abstract

We continue support the Federal Bank of Boston “Working Cities” challenge which aims to support social and economic recovery of underperforming small and mid-sized cities in the New England region. We continue to extend our data profiles of these cities located in Massachusetts, Rhode Island and now Connecticut. It is our hope that these data ‘rich” profiles which includes key indicators on health, population and demographic changes, industrial growth, and educational performance can not only support policy development in these targeted areas, but also help in monitoring the progress these cities make over time.
