

Every year, money was important, money seemed to be the
 power. In the past they were more afraid of money, but now they
 were more afraid of the state. The state was the power. The state
 was the power. The state was the power. The state was the power.

They were afraid of the state. They were afraid of the state. They
 were afraid of the state. They were afraid of the state. They were
 afraid of the state. They were afraid of the state. They were afraid
 of the state. They were afraid of the state. They were afraid of the
 state. They were afraid of the state. They were afraid of the state.

They were afraid of the state. They were afraid of the state. They
 were afraid of the state. They were afraid of the state. They were
 afraid of the state. They were afraid of the state. They were afraid
 of the state. They were afraid of the state. They were afraid of the
 state. They were afraid of the state. They were afraid of the state.

They were afraid of the state. They were afraid of the state. They
 were afraid of the state. They were afraid of the state. They were
 afraid of the state. They were afraid of the state. They were afraid
 of the state. They were afraid of the state. They were afraid of the
 state. They were afraid of the state. They were afraid of the state.
